# Make Spring Cleaning Fun and Engaging for Kids

It's hard to believe that spring is here! For parents, having a clean and disinfected living space can create a more positive home environment for your kids and helps to prevent the spread of illness-causing germs. As you gear up for spring cleaning, incorporate these tips to create healthy habits in the spring and all year long.

## Declutter Your Space

Start by getting rid of anything that is no longer useful, like books, old toys, and broken electronics, that might be taking up extra space. Consider donating or recycling items that are still in good condition.

## Disinfect High-Touch Surfaces

It's important to deep clean and disinfect the surfaces in the home that kids are constantly touching: countertops, chairs, doorknobs, toys, tables—you know the drill. Lysol Disinfecting Wipes kill 99.9 percent of viruses and bacteria when used as directed and make it easy to clean and disinfect hard surfaces in your home on a regular basis. You can now shop for Lysol Disinfecting Wipes at your local wholesale retailer and [learn more here](#). This is a great opportunity to stock up ahead of your spring cleaning and to make sure you have plenty of wipes at home.

## Encourage Your Kids' Participation

Getting your kids involved in the spring cleaning process can make it more fun and engaging for everyone. Consider giving your children a short list of tasks or having a cleaning day where the whole family works together to declutter, clean, and organize.

## Reinforce Healthy Habits

The changing of the seasons is a great time to reinforce important habits at home that your kids can transfer to the classroom. From handwashing best practices to learning about how germs are spread, Lysol is proud to share a variety of resources aimed to make learning about healthy habits both engaging and informational—including a variety of lesson plans, posters, and activities that can be used year-round.
